

WADIQA BAIG

Data science & AI Intern | Cloud Solution Intern | Web Developer Intern

Dubai, UAE | +971 55159 7367 | wadiqabaig@gmail.com | [linkedin.com/in/wadiqabaig](https://www.linkedin.com/in/wadiqabaig) | github.com/wadiqabaig

PROFESSIONAL SUMMARY

Enthusiastic final-year student in Bachelor of Information Technology. Interested in an opportunity in IT, Cloud Computing, and AI, where I can apply my skills and contribute to meaningful projects. Highly motivated and passionate individual, with strong teamwork and collaboration skills, and a positive attitude in all professional interactions. Eager to leverage my education and technical expertise to support the organisation's goals and growth.

EDUCATION

Murdoch University Dubai, B.IT in Computer Science and Artificial Intelligence, GPA: 3.417 / 4.0 *Sep 2023 - Dec 2026*

TECHNICAL SKILLS

Programming Languages: C++, C, Python, Java, JavaScript, MATLAB, HTML, CSS, Bash.

Frameworks & Tools: AWS, Cisco Packet Tracer, Linux, WordPress, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, MS Project, MS Visio, MS Office Suite.

Relevant Coursework: Data Structures & Algorithms, Machine and Deep Learning, Cloud Computing, Software Engineering.

CERTIFICATION

AWS Certified Cloud Practitioner ([CLF-C02](#)) *Sep 2025 - Sep 2028*

WORK EXPERIENCES

United Delta For Information Technology - Cloud Solutions Intern **Dubai, UAE**

AWS, Cloud Computing, Serverless, Workflow Automation *Jun 2025 – Aug 2025*

- Gained hands-on experience in cloud technologies and digital transformation, focusing on AWS.
- Learned fundamentals of cloud computing, infrastructure, and workflow automation.
- Worked on projects related to cloud adoption and serverless architectures.

SecureMyScholarship - Admissions Recruiter **Dubai, UAE**

Remote Collaboration, CRM, Stakeholder Advisory *Aug 2024 – Jul 2025*

- Reached out to and counseled 100+ prospective students, facilitating university admissions and scholarship security through structured advisory.
- Operated independently in a remote setting to manage student pipelines, demonstrating strong self-discipline and professional communication skills.
- Collaborated with a distributed team to meet enrollment targets, maintaining high standards of data accuracy and responsiveness.

PROJECTS

Facial Emotion Recognition System (CBAM-EfficientNetB0) | PyTorch, Python, Scikit-learn, Data Augmentation *Mar 2026*

- Engineered a custom CBAM-EfficientNetB0 computer vision pipeline to classify 7 human affective states using the FER-2013 dataset.
- Implemented Smoothed Focal Loss, Test-Time Augmentation, and a Weighted Random Sampler to overcome extreme class imbalance and label noise.
- Achieved **70.70%** accuracy, standing as the **only model** in the research scope to surpass the baseline benchmark while operating with fewer than 5 million parameters.

Moodle Master Dubai Edition [link](#) | JavaScript, HTML, CSS, DOM Manipulation, JSON *Jan 2026*

- Developed a custom browser extension for university students to overhaul the User Interface (UI) of the Moodle Learning Management System, focusing on accessibility and ease of use.
- Programmed the core logic using vanilla JavaScript to inject custom CSS and manipulate DOM elements, creating a cleaner and more responsive navigation structure.
- Launched the tool to **45+ active users**, continuously iterating on the interface based on real-time student feedback to resolve bugs and optimise performance.

- Co-developed an interactive data visualisation dashboard to analyse the correlation between student lifestyle habits and academic performance, focusing on intuitive user experience and data storytelling.
- Designed the complete UI/UX architecture using Dash and custom CSS, implementing a multi-page layout with breadcrumb navigation and dynamic filters (dropdowns, sliders) to enhance user engagement.
- Performed data preprocessing using Pandas to clean missing values and engineer features from **1,000+ records**, transforming raw data into structured inputs for accurate real-time visualisations.

Abalone Age Prediction [link](#) | Python, Scikit-learn, Pandas, SHAP, Matplotlib

Jun 2025

- Engineered a machine learning solution to predict abalone age categories based on physical measurements, translating raw data into actionable classification insights.
- Implemented Logistic Regression and Random Forest algorithms, achieving **~89% accuracy** through rigorous data preprocessing and feature engineering.
- Integrated Explainable AI (XAI) tools (SHAP & LIME) to visualize model decisions, ensuring the "black box" logic was transparent and interpretable.

Car Connect Dubai [link](#) | WordPress, Amazon EC2, Amazon Route 53, CSS, Web Design, GoDaddy

Jul 2024

- Designed and deployed a scalable web platform for a car showroom to digitally showcase inventory, ensuring a consistent and professional visual identity.
- Configured and hosted the website on an Amazon EC2 instance, managing server-side requirements to ensure high availability and fast load times for media-rich content.
- Customised the frontend theme using CSS to guarantee full responsiveness across mobile and desktop devices, delivering a production-ready client solution.

LEADERSHIP**AWS Student Builder Group****Dubai, UAE****Leader***Feb 2026 – Present*

- Selected by AWS to lead the university's first cloud community at Murdoch University Dubai, dedicated to hosting events/workshops for students on AWS and cloud careers.

Computing Society**Dubai, UAE****Vice President of Bits & Bites***Jan 2026 – Present*

- Facilitate weekly technical workshops and coding seminars, coordinating with faculty to enhance student engagement and practical skill development.
- Spearhead the organisation of campus-wide hackathons and networking events, fostering a collaborative community for peer-to-peer learning and industry connection.

Rabbitron Lab**Dubai, UAE****Club Representative***Nov 2025– Present*

- Serve as the primary liaison between the university and Rabbitron Lab, coordinating logistics for on-campus AI and machine learning workshops.
- Drive student participation in hands-on technical sessions (e.g., Hackathon), helping to build a local community of 190+ AI enthusiasts
